## UNICELL® HMS

A special ingredient that gives absolute value to your products.

**Your winning choice to always be one step ahead!**

## Dongjin Italia

An ambitious and dynamic partner of a global leader as Dongjin Semichem, number one in the world of blowing agents with UNICELL® series.

Dongjin Italia, legal and operational headquarter in Milan, produces the HMS series in the production site in middle of Italy and distributes the entire range of the UNICELL® series.

**To reach You wherever You are!**

## UNICELL® HMS

Microspheres are hollow thermoplastic bubbles gas filled that are successfully used as ultra light fillers in paints, coatings, leather finishing and many other applications. They are an expanded type of UNICELL® MS.

With a mean particle diameter of 15  $\mu\text{m}$  to 150  $\mu\text{m}$ , extremely low density of 17 to 45  $\text{kg}/\text{m}^3$ , extraordinary elasticity, they can be supplied as wet or dry powder, making them suitable for both water-based and solvent-based products.

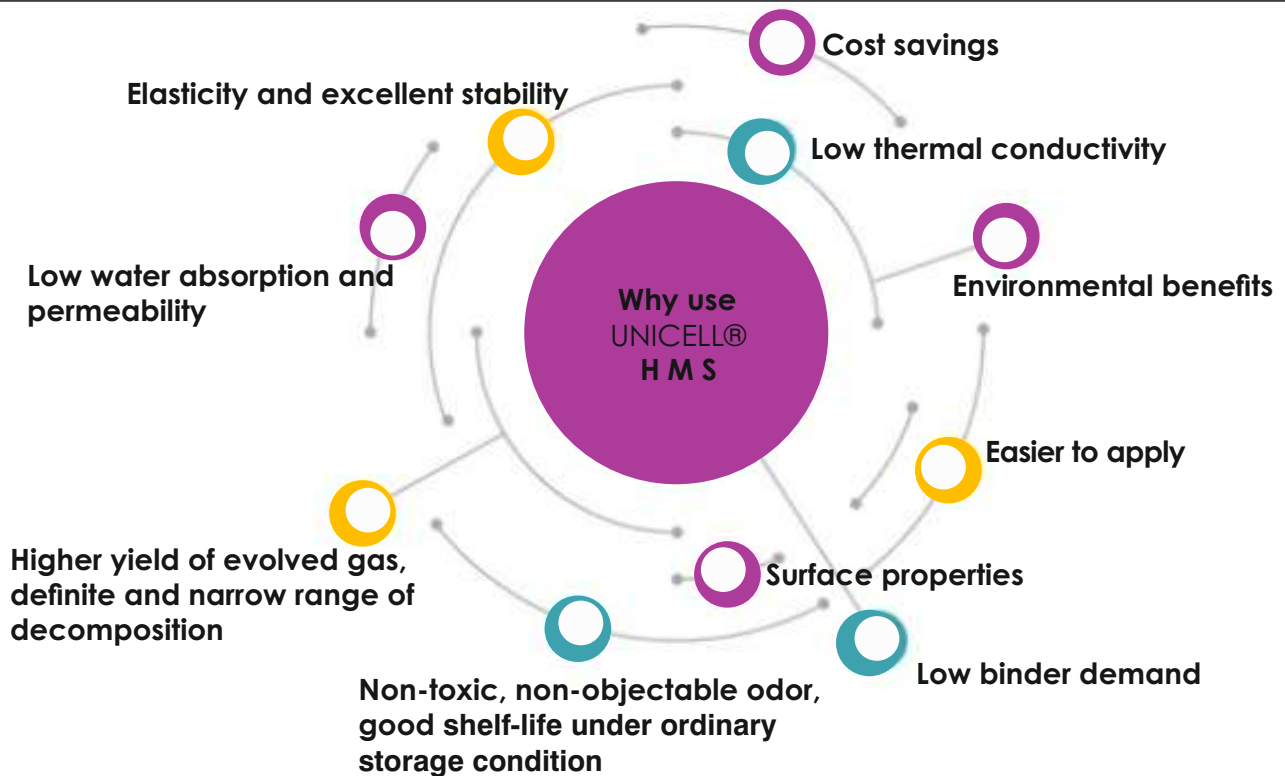

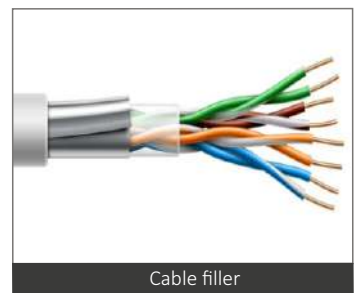

**Get the incredible!**
